

Healthier Oil for Catering

The Carotino Group produces a number of products suitable for the commercial catering market. All the oils in the Carotino range are naturally rich in anti-oxidant alpha and beta carotenes (pro-Vitamin A) and tocotrienols and tocopherols (Vitamin E). They are cholesterol-free and refined without the use of chemicals. The range includes:

Carotino Oil - CC 125

Carofry 50 - CF 50

Canola Plus - CL 50

Cooking with Carotino products:

- Carotino Oil and Canola Plus are suitable for many kinds of cooking including frying, baking, roasting and making salad dressings, while Carofry 50 provides a healthier option for deep frying.
- No other widely available cooking oils contain pro-Vitamin A.
- The oils are higher in Vitamin E than most other cooking oils.
- Carotino Oil and Canola Plus contain Omega 3 and 6 essential fatty acids.
- The oils all have a high smoke point which indicates they are fully refined and reduces the fire hazard.
- The natural carotene content adds a subtle hint of golden colour to food making it look more appetising, without the need for artificial additives or colourings.

The health agenda

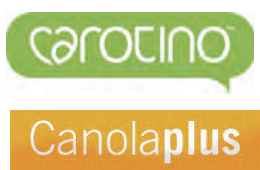

Carotino Oil and Canola Plus can help caterers support consumer demand for healthier meals. They are ideal for use in catering environments where healthy eating standards are in place, such as schools and hospitals, or anywhere which takes nutritious food seriously.

Carofry 50 is suitable for upmarket fish and chip shops and other fast food outlets which use premium quality materials for healthier end products.

All the oils in the range are suitable for special diets such as vegetarian and vegan, gluten free, Halal and Kosher.

Environmental credentials

The red palm fruit oil used in Carotino Oil, Canola Plus and Carofry 50 comes from environmentally sustainable plantations in Malaysia. All Carotino products are ethically sourced and cultivated according to strict internationally-recognised environmental laws. Carotino Group products are RSPO certified.

Technical information

Carotino Oil (CC 125)

Parameters	Specifications	Typical
Free Fatty Acid %	0.1 max	0.058
Moisture & Impurities %	0.1 max	0.03
Iodine Value	95 min	103.5
Carotenes, ppm	125 min	148
Tocopherols & Tocotrienols, ppm	550 min	822

Canola Plus (CL 50)

Parameters	Specifications	Typical
Free Fatty Acid %	0.1 max	0.036
Moisture & Impurities %	0.1 max	0.03
Iodine Value	95 min	96.2
Carotenes, ppm	125 min	52
Tocopherols & Tocotrienols, ppm	550 min	1058

Carofry 50 (CF 50)

Parameters	Specifications	Typical
Free Fatty Acid %	0.1 max	0.056
Moisture & Impurities %	0.1 max	0.03
Iodine Value	56 min	57.2
Carotenes, ppm	30 - 70 min	52
Tocopherols & Tocotrienols, ppm	800 min	1022
